Journal of Fluid Mechanics Volume 522 **10 January 2005**

O. Praud, A. M. Fincham & J. Sommeria	Decaying grid turbulence in a strongly stratified fluid	1
J. R. Martin & G. F. Lane-Serff	Rotating gravity currents. Part 1. Energy loss theory	35
J. R. Martin, D. A. Smeed & G. F. Lane-Serff	Rotating gravity currents. Part 2. Potential vorticity theory	63
G. Barrios, R. Rechtman, J. Rojas & R. Tovar	The lattice Boltzmann equation for natural convection in a two-dimensional cavity with a partially heated wall	91
V. S. Malyuga	Viscous eddies in a circular cone	101
C. P. Malhotra, P. D. Weidman & A. M. J. Davis	Nested toroidal vortices between concentric cones	117
S. Watanabe & M. G. Mungal	Velocity fields in mixing-enhanced compressible shear layers	141
V. Wheatley, D. I. Pullin & R. Samtaney	Regular shock refraction at an oblique planar density interface in magnetohydrodynamics	179
F. Flemming & C. H. K. Williamson	Vortex-induced vibrations of a pivoted cylinder	215
S. Poncet, M. P. Chauve & P. Le Gal	Turbulent rotating disk flow with inward throughflow	253
M. W. Reeks	On probability density function equations for particle disperson in a uniform shear flow	263
T. Wei, P. Fife, J. Klewicki & P. McMurtry	Properties of the mean momentum balance in turbulent boundary layer, pipe and channel flows	303
S. D. Watt & G. J. Sharpe	Linear and nonlinear dynamics of cylindrically and spherically expanding detonation waves	329
J. N. Reinaud & D. G. Dritschel	The critical merger distance between two co-rotating quasi-geostrophic vortices	357
J. Wang, D. D. Joseph & T. Funada	Pressure corrections for potential flow analysis of capillary instability of viscous fluids	383
H. M. Blackburn, F. Marques & J. M. Lopez	Symmetry breaking of two-dimensional time-periodic wakes	395
